EXPERIENCE

Resthero – United Arab Emirates

Fullstack Engineer

Feb 2022 – Present

Remote

- Pioneered the integration of Google Pay, Apple Pay, TELR, and Checkout payment gateways into the React ecosystem, enhancing user convenience and boosting transaction volumes by providing seamless, secure payment options.
- Spearheaded the Google Maps API integration, creating dynamic and interactive map features within React applications, which optimized billing costs by 25% through strategic implementation.
- Implemented advanced Excel sheet handling functionalities, including upload, download, and various data manipulation features, significantly improving data management and operational efficiency.
- Deployed advanced monitoring tools like Sentry and LogRocket to track application errors and user interactions in real time, enabling proactive issue resolution and significantly improving user satisfaction.
- Successfully integrated multiple logistics services, including Careem and Talabat, Delivery Zone, within React applications, streamlining delivery processes and improving user experience.

Craxiono Technologies – India

Fullstack Engineer

October 2021–Feb 2022

Kochi , Kerela

- Transformed application architecture into a Single Page Application (SPA) using React Router v4, enhancing navigation and user experience with smooth, seamless transitions.
- Integrated Redux Promise middleware for efficient data retrieval, leading to a 20% improvement in application performance by streamlining asynchronous operations.
- Implemented dynamic functionality with Action Creators and Redux Toolkit, resulting in a 25% enhancement in state management efficiency and reducing boilerplate code.
- Developed web and desktop chat applications using the XMPP protocol, ensuring reliable and secure message transmission, which improved real-time communication capabilities.

BellaCode – India

Fullstack Engineer

August 2020 – Oct 2021

Kochi , Kerela

- Developed and maintained scalable backend services using Erlang and XMPP, resulting in a 30
- Engineered cross-platform desktop applications with Electron and React, leading to a 25
- Implemented VoIP solutions, optimizing protocols for voice communication, which enhanced call quality and reduced latency by 15%.

EDUCATION

Masters's of computer applications.
- 8.5 CGPA

Lovely Professional University

2021

Bachelor of Computer Applications.
- 8.0 CGPA

University of Kashmir

2018

Higher Secondary - 73%

Jammu and Kashmir State Board of School Education

2015

Secondary - 70%

Jammu and Kashmir State Board of School Education

2013

PROJECTS

E-commerce Platform with Advanced Payment Integration:

- Description: Developed a comprehensive e-commerce platform featuring seamless integration with multiple payment gateways, including Google Pay, Apple Pay, TELR, and Checkout.
- Key Technologies: React, Redux, Stripe API, Google Pay API, Apple Pay API, TELR API, Checkout API.

Job Portal Platform

- Description: Developed a comprehensive job portal platform enabling job seekers to find suitable employment opportunities and employers to post job listings and manage applications.
- Key Technologies: React, Redux, Node.js, Express, MongoDB, RESTful APIs, JWT Authentication, Material-UI.

Project Management Tool

- Description: Developed a robust project management tool designed to help teams plan, track, and manage their projects efficiently, with features for task assignment, progress tracking, and collaboration.
- Key Technologies: React, Redux, Node.js, Express, MongoDB, Socket.IO, RESTful APIs, Material-UI, JWT Authentication.

TECHNICAL SKILLS

- HTML, CSS, TailwindCss, AntdD, Bootstrap
- JavaScript, React, React Native, Node, Express, Next.js, Electron.js,
- Npm, Git, Yarn
- MongoDB
